**What is a Test Case?**

A test case is a set of steps, inputs, and expected results to verify functionality.

**What is a Test Scenario?**

A test scenario is a high-level description of what needs to be tested.

**What is a Test Plan?**

A test plan describes the scope, approach, resources, and schedule of testing.

**What are Positive and Negative Test Cases?**

Positive test cases use valid inputs; negative test cases use invalid inputs.

**What is Boundary Value Analysis (BVA)?**

BVA focuses on testing boundary values of input ranges.

**What is Equivalence Partitioning?**

Equivalence Partitioning divides inputs into valid and invalid groups.

**What is Decision Table Testing?**

Decision table testing validates combinations of inputs and outcomes.
